JIM PEGUES: I'm Jim Pegues, spelled P-e-g-u-e-s, and I do nuclear waste oversight for the City of Las Vegas. And the reason I'm up here tonight is none of the elected officials could be here tonight. We wanted to let the constituents know that the mayor and the city council strongly oppose Yucca Mountain.

1 And [we consider the Supplement Environmental Impact Statement and the Draft Environmental Impact  
2 Statement to be totally inadequate.] And we're following this issue very, very closely. [We have written to the Department of Energy and asked them for a 45-day extension for the comment period, and we will be submitting written comments.]

I do not have any comments prepared tonight; however, I am working with the Clark County representatives and the state representatives, and we together will do our best to fight Yucca Mountain to the end.

Thank you.
